PROFILE

Revenue Operations professional with hands-on ownership of a live CRM system (HubSpot): process design, data hygiene, integrations, and reporting that keep Sales, Marketing, Finance, and Operations aligned around one pipeline. Backend engineering background means I build and automate the systems that make process improvements stick, not just recommend them. HubSpot Revenue Operations Certified.

EXPERIENCE

Steinbeis University (Steinbeis Next) <i>Working Student, Revenue Operations & Platform Automation</i>	Berlin, Germany Dec. 2024 – Present
- Own the HubSpot CRM instance end to end: designed and built an event-driven integration with the Academy5 ERP that automated contract delivery and enrollment (deal-to-close) workflows, replacing manual handoffs between Sales/Admissions and Operations. - Manage pipeline stage design and CRM data hygiene across the prospective-student lifecycle (lead → applicant → enrolled), the university's equivalent of a B2B sales funnel, improving forecast accuracy and funnel visibility for leadership. - Defined and monitor operational KPIs (conversion rates by stage, enrollment forecasts, pipeline velocity) and built the Next.js/React dashboards that report them, replacing spreadsheet-based tracking for the operations team. - Standardised the deployment lifecycle for internal RevOps tooling on GitHub Actions, Docker and Kubernetes, introducing automated test and validation gates to keep CRM and reporting systems reliable. - Translate evolving requirements from cross-functional stakeholders (Sales, Ops, Finance) into working tools, including an automated lead-matching engine and internal qualification tooling.	
Institute of Biometrics and Medical Informatics, OVGU <i>Student Assistant, Data Infrastructure & Reporting</i>	Magdeburg, Germany Aug. 2024 – Dec. 2024
- Built automated ETL pipelines in Python that ingested, cleaned and normalised highly variable records into structured PostgreSQL schemas, consolidating fragmented data into a single reporting-ready source. - Developed FastAPI endpoints exposing curated datasets to a React/TypeScript reporting interface, replacing manual database queries for research staff.	
Cognizant Technology Solutions <i>Programmer Analyst</i>	Bangalore, India Sep. 2021 – Mar. 2023
Delivered feature modules and REST API integrations for the Dunkin' Donuts USA application within a cross-functional Agile team, coordinating with product and business stakeholders on release scope.	

CLIENT DELIVERY

Enterprise Enablement & Process Alignment <i>Home Credit Bank, Almaty, Kazakhstan</i>	May 2026
Ran discovery sessions with the bank's business and technical stakeholders to identify process/infrastructure gaps, then designed and delivered a four-day on-site programme on scalable process architecture and system integration.	

EDUCATION

Otto von Guericke University <i>M.Sc. Digital Engineering</i>	Magdeburg, Germany Apr. 2023 – Oct. 2026 (expected)
- Thesis: automated user story classification using a hybrid BERT + Bi-GRU model, with NLP pipelines for structuring enterprise software requirements. - Focus: Machine Learning, Distributed Systems, Database Concepts, Software Development.	
Visvesvaraya Technological University <i>B.E. Telecommunication Engineering</i>	Bangalore, India Aug. 2017 – Aug. 2021

REVENUE OPERATIONS & TECHNICAL SKILLS

Revenue Operations & CRM: HubSpot (Sales Hub, Service Hub, RevOps), CRM administration & data hygiene, lead/pipeline management, deal-stage & workflow design, KPI & funnel reporting, forecasting
Data & Analytics: SQL, PostgreSQL, Pandas, NumPy, ETL pipelines, dashboarding (Next.js, React), Python
Systems & Integration: HubSpot CRM API, webhooks, event-driven sync design, Make, REST API integration, GitHub Actions, Docker, Kubernetes
Ways of working: Agile/Scrum, Jira, cross-functional stakeholder management, process design & documentation, rapid prototyping

CERTIFICATIONS, LANGUAGES & VOLUNTEERING

Certifications: HubSpot Revenue Operations Certified (2026) HubSpot Service Hub Software Certified (2026) Google Cloud Engineer Learning Path Google Data Analytics Professional Certificate
Languages: English (C1–C2) German (B1, actively improving) Telugu (native)
Volunteering: Student Lead, OVGU Academic Club: organised inter-departmental technical talks and student projects.
